G. Jake Gunnell

gunnjakeim@gmail.com | linkedin.com/in/gary-jake-gunnell | jakegunnell.com

Systems Developer and Information Systems student with hands-on experience in AI integration, cloud infrastructure, workflow automation, and enterprise systems development. Skilled in Python, SQL, AWS, and designing technology solutions that improve operational efficiency and support business needs

EDUCATION

B.S. Information Systems **May 2028**

Software & Systems Development Emphasis, STEM-Certified Technical Program

Brigham Young University - Marriott School of Business, Provo, UT

- GPA: 3.67
- Relevant Coursework: AI and Agentic Systems, Database Systems, Enterprise Application Development, Business Programming, Systems Design, Data Communications, IS Security & Controls, Machine Learning

TECHNICAL SKILLS

AI & Automation: Claude Code, ChatGPT, MCP Servers, Agentic Workflows, RAG, AWS Bedrock, Ollama
Programming: Python, SQL, JavaScript, C#, HTML/CSS
Cloud & Infrastructure: AWS (EC2, RDS, S3, Bedrock), Linux, Docker, Slurm, GitHub Actions, CI/CD, Azure, Vercel
Databases & APIs: PostgreSQL, Supabase, SQLite, REST APIs, Database Design
Frameworks & Tools: FastAPI, React, Next.js, Node.js, Polars, Git
Certifications: Professional Scrum Master I (PSM I), Scrum.org — 2026

PROJECT EXPERIENCE

- **Silver Fund AI Knowledge Assistant | 2026–Present:** Developing a Retrieval-Augmented Generation (RAG) chatbot using Python, AWS Bedrock (Claude), and Amazon S3, integrating document processing and retrieval workflows to provide fund members with natural-language access to financial documentation
- **AI Lecture Processing Automation | 2026:** Built a one-click desktop automation workflow that processes recorded lectures, automatically renames files, generates transcripts and AI-powered summaries, and organizes outputs into designated folders
- **J. Gunnell Law, LLC (gunslaw.com) | 2026-Present:** Deployed and maintained a business website using Vercel, Supabase, and Resend, integrating cloud database and email services with a scheduled cron job to prevent free-tier database inactivity
- **Algorithmic Trading Systems | 2025–2026:** Built Python crypto and stock trading bots using Binance.US and Alpaca APIs, combining momentum, SMA/RSI strategies, technical screening of 300+ stocks, risk controls, and AI-assisted trade explanations.

EXPERIENCE

Systems Developer **Jun 2026 – Present**

BYU Finance Program, Provo, UT

- Sole developer responsible for translating Finance Program needs into an internal alumni-management system supporting data management, reporting, events, follow-up workflows, staff administration, and long-term alumni engagement
- Architected a full-stack application using Next.js, FastAPI, PostgreSQL, Supabase, and Vercel, integrating authentication, role-based access, administrative tools, and deployment infrastructure
- Designed a 25-table PostgreSQL database supporting alumni profiles, event attendance, follow-up workflows, and data management
- Built data-ingestion and cleaning workflows that validate, and deduplicate alumni records, improving data quality and import reliability
- Developed reporting, search, and validation queries used to support operational decision-making and data maintenance
- Implemented access controls, authentication, testing, and deployment processes to improve system reliability and security

Full-Stack Software Engineer | Quant Fund Developer **Nov 2025 – Present**

BYU Silver Fund – Student Investment Fund, Provo, UT

- Supporting AI system development and document-processing infrastructure for internal financial research and knowledge management
- Managing financial data infrastructure and automated pipelines across Linux servers, AWS, and high-performance computing systems
- Implemented Slurm-based job scheduling to automate financial data pipelines across multiple database environments, allocating dedicated computing resources for resource-intensive workloads
- Built automated pipeline monitoring and Slack failure alerts to identify production issues, accelerate troubleshooting, and improve operational reliability
- Developed and maintained full-stack applications and REST APIs using FastAPI, React, PostgreSQL, and Python

ADDITIONAL INFORMATION

- Languages: Fluent in Tagalog; conversational in Bicolano
- Leadership & Achievements: Eagle Scout, Boy Scouts of America (2019)
- Athletics: Varsity, club, and travel lacrosse
- Interests: Fitness, college basketball, stock market investing, cryptocurrency, and real estate
