

G. Jake Gunnell

gunnjakeim@gmail.com | linkedin.com/in/gary-jake-gunnell | jakegunnell.com

Systems Developer and Information Systems student with experience designing business systems, improving data workflows, analyzing operational needs, and working with stakeholders to implement technology-enabled solutions. Experienced with SQL, Python, databases, data analysis, and project coordination.

EDUCATION

B.S. Information Systems

Fall 2027

Software & Systems Development Emphasis, STEM-Certified Technical Program

Brigham Young University - Marriott School of Business, Provo, UT

- GPA: 3.67
- Relevant Coursework: Database Systems, Enterprise Application Development, Business Programming, Systems Design, Data Communications, IS Security & Controls, Machine Learning

TECHNICAL SKILLS

Programming Languages: SQL, Python, JavaScript, C#, HTML/CSS

Databases: PostgreSQL, SQLite, Supabase, Database Design, Normalization

SQL: Complex Joins, CTEs, Window Functions, Aggregations, Query Optimization

Backend & APIs: RESTful APIs, API Design, Authentication, Authorization, Data Pipelines

Data & Analytics: Excel, Polars, Plotly, Data Pipelines, Tableau, Power BI

Cloud & DevOps: AWS (EC2, RDS, S3), Docker, Nginx, Linux, Git, GitHub Actions, CI/CD, Vercel, Azure

Frameworks & Libraries: FastAPI, Node.js, Express, React, Flask, Next.js

AI-Assisted Development: Claude Code (terminal AI agent), MCP servers, agent workflows, and local LLMs (Ollama); Claude and ChatGPT for rapid prototyping, debugging, backend development, and workflow automation

Certifications: Professional Scrum Master I (PSM I), Scrum.org — 2026

PROJECT EXPERIENCE

- **BEACON Nonprofit Intelligence Platform (INTEX) | 2026:** Built a full-stack, multi-role web platform using React, C#, PostgreSQL, and Supabase with role-based authentication, dashboards, and data-driven impact and donor analytics
- **Crypto Trading Bot | 2025:** Built an automated Python trading bot for Binance.us using SMA-crossover and RSI strategies with regime-aware switching and layered risk controls (ATR-based stop-loss/take-profit, crash detection); ran live and logged real trades, with a local Flask dashboard
- **Stock Trading Bots | 2026:** Built two rule-based stock bots on the Alpaca API (paper trading) — a Flask momentum/trend trader and a FastAPI scanner that processes and ranks 300+ stocks using technical indicators and generates AI-assisted trade explanations
- **Huus Cleaning Platform | 2025:** Built a full-stack web application using Node.js, Express, PostgreSQL, and Tailwind; implemented backend routing and admin workflow
- **Ella Rises Nonprofit Platform (INTEX) | 2025:** Built a full-stack, multi-role web platform using Node.js, Express, PostgreSQL, AWS, and Nginx with role-based authentication, dashboards, and event registration

EXPERIENCE

Systems Developer

Jun 2026 – Present

BYU Finance Program, Provo, UT

- Sole developer responsible for translating Finance Program needs into an internal alumni-management system supporting data management, reporting, events, and follow-up workflows
- Designed a 25-table PostgreSQL database architecture supporting alumni records, events, follow-up tasks, and audit history
- Built data-ingestion and cleaning workflows that normalize, validate, and deduplicate alumni records, improving data quality and import reliability
- Developed reporting, search, and validation queries used to support operational decision-making and data maintenance
- Implemented access controls, authentication, testing, and deployment processes to improve system reliability and security

Full-Stack Software Engineer

Nov 2025 – Present

BYU Silver Fund – Student Investment Fund, Provo, UT

- Architected Python ETL pipelines using Polars to automate financial data processing and improve backend performance
- Developed and maintained a production full-stack web platform using FastAPI, React, PostgreSQL, and Polars
- Designed RESTful API endpoints enabling portfolio analytics, reporting, and financial data exports
- Built and optimized React frontend components while resolving API integration and data consistency issues

Volunteer Representative - Tagalog & English Proficiency

Jun 2022 – Jun 2024

The Church of Jesus Christ of Latter-day Saints, Philippines

- Led teams of up to 12 individuals in goal-setting and leadership, coordinated service projects in under-developed communities

OTHER SKILLS

Eagle Scout, Boy Scouts of America (Aug 2019); Varsity, Club, and Travel Lacrosse teams; enjoy working out, watching college basketball, and researching stocks, crypto, and real estate
